AMENDMENTS TO THE CLAIMS

1-14. (Cancelled)

15. (Currently amended) An information processing terminal capable of communicating with an external recorder/player and controlling a reproduction of video information of a program stored in [[a]] the external recorder/player, comprising:

- a broadcast receiver which receives a broadcast signal that contains video information of a program and information about the program;
- a display which displays the video information received by the broadcast receiver;
- a storage which extracts a part of the video information as program identification image information and stores the program identification image information associated with the information about the program when a recording instruction is inputted by a user of the information processing terminal while the video information is being displayed by the display;
- a transmitter which transmits information to the external recorder/player; and
- a controller which controls the display so as to display the program identification image information stored in the storage and the transmitter so as to transmit the information about the program associated with the program identification image information to the external recorder/player when a reproduction instruction is inputted by the user after the program identification image information displayed by the display has been selected by the user.

16. (Currently amended) The information processing terminal according to claim 15, wherein the transmitter transmits a recording instruction with the information about the program to the external recorder/player when the recording instruction is inputted by the user.

Application No.: 10/618,854

17. (Currently amended) The information processing terminal according to claim 16, further comprising a receiver which receives information from the external recorder/player, wherein the receiver receives information about a rebroadcast of the program and the controller controls the display so as to display the information about the rebroadcast of the program.

18. (Previously presented) The information processing terminal according to claim 15, wherein the information about the program is information that indicates a program ID, a program title, a broadcast channel or a broadcast time zone.

19. (Previously presented) The information processing terminal according to claim 15, wherein the program identification image information is still picture information.
